

Guard Track GT

Guard Tour System is a comprehensive solution for busy Security Departments that require a System that fully tracks all the fields activity and task performed by their Security Personnel.

The system works by installing a series Of RFID Tags along patrol routes and having patrolling personnel perform readings on the cards as they pass using the hand held readers.

The recorded card numbers and associated time stamps are later uploaded via communication adapters to computer for processing and verification.

The results are either printed or displayed on the screen, where managers are able to review at once the job performance data of the patrolling personnel.

- Physical: Metal Body with rubber shell outside.
- IP Category: IP67 (waterproof & weatherproof)
- Tamper Resistant.
- Frequency: 125KHz
- Temperature: -40 C to + 85 C
- Humidity: 10% to 90% non-condensing
- Battery: 3.7V Rechargeable Battery, 1150mAh
- Card Detection: Auto Induction card-reading
- Communication: Pogo pin connection cable
- Dimensions: 148mm x 47mm x 30mm
- Weight: 243g
- Memory: 4Mb Flash ROM
- Battery Life: 6000 pieces records
- Reading Distance: 3cm-5cm
- LED Specification: Irradiate distance 5-6m
- Flashlight with touch button, Patrolling in the night will not be a problem
